## **TIPS for using DICAS**

1. Highly consider viewing the videos for DICAS which can be found on the ACEND website (Computer Matching page) <http://www.eatrightacend.org/ACEND/content.aspx?id=6442485425>
2. Payment -- a student is not prompted for payment until he/she clicks "submit." Students can create an account and work on personal statements and information as much as they want without providing any payment. If the student does not decide to submit any applications, they owe DICAS nothing.
3. Changes to application -- once an application has been submitted through DICAS, the student cannot make any changes or withdraw their application through DICAS. If there was a situation that required a change or withdrawal, they would then need to contact the program directly.
4. GPA -- it is true that GPA is calculated for the student once they submit some necessary information (i.e. academic format such as semester vs. trimester). However, if a school uses "units" instead, the student must first do these conversions based on the information on the back of their transcript (usually) or with help from their registrar's office. DICAS works in grade points only.
5. Personal Statement -- students can create multiple personal statements in their DICAS account -- one for each program they are applying to. However, they should be informed that there are 2 places in the submission process where they need to **SELECT** the specific personal statement in order for it to be included in the application. They will get an error message from DICAS if they try to submit without selecting the personal statement.
6. Status Bar -- students can check the status of each submission and be informed of things like whether their transcripts have been received, references have been completed, or GPA has been calculated.
